

Administering Programs to Fund Vaccines

KidsVax® is dedicated to serving states in the administration of state-mandated universal vaccine purchase programs.

Why KidsVax®?

KidsVax® (KV) is uniquely structured to provide turn-key administrative services for states interested in developing, implementing, and maintaining universal vaccine purchase programs. KV staff includes a wide-range of experts from the legal, health care, insurance, government affairs, information technology, accounting, and data analyst fields, all of whom possess a deep interest in improving health outcomes for children and adults. We recognize that, next to clean drinking water, vaccines are the second most effective public health initiative of all time. We desire to help those concerned with local health care facilitate access to this important resource.

IMPROVED ACCESS

Making vaccines available to all, regardless of their economic status, affords access to improved healthcare and better outcomes for both individuals and their communities.

LOWER COSTS

States that serve as the single purchaser of vaccines for their entire population benefit from reduced vaccine costs. Savings range from 15 to 60 percent below private purchase alternatives, depending on the vaccine.

PROVIDER BENEFITS

Financing and staffing burdens associated with maintaining separate vaccine inventories for private and public programs are eliminated while assuring Providers of a reliable vaccine supply. Providers still bill insurers for vaccine administration services.

Our Staff

KidsVax® is a multidisciplinary team which makes the nation's most experienced base available to help states fund universal purchase programs. As a result, all state residents receive vaccines at no charge regardless of insurance or other program eligibility status.

FULL-TIME STAFF

- Fred L. Potter**, Managing Member
- Julia G. Walter**, Deputy Executive Director (WA & AK), Associate General Counsel
- Claire M. Roberge**, Contoller

Our Services

KidsVax® (KV) partners with state health departments to provide a full-range of services: from technical review of authorizing statutes, to subject matter consulting, to program implementation and ongoing turn-key administration. Through the sole KV source, contracting officials gain the strength of a diverse multidisciplinary specialist team in each case led by an individual with focus on that particular state's distinctive needs.

Initial work includes branding and website set-up, assessment mechanism development, extensive stakeholder communication, advice on governing entity choice, policy formation, and payer compliance.

Longer-term services center upon timely delivering adequate funds to the state for private vaccine purchase. KV supports all vaccine board and

committee activities, ensures that policies and procedures are followed, handles programmatic service related inquiries, provides annual assessment rate recommendations, and maintains transparency and accountability through periodic reporting and program effectiveness evaluation.

OUR CLIENTS

KV is the program administrator for universal vaccine funding in New Hampshire, Maine, Vermont, Washington, Alaska, and Rhode Island. It has also provided consulting and other services in a number of additional states.
